

HUSHP Waiver Checklist and Comparison Chart

Massachusetts law requires that any full-time or part-time student enrolled in an institution of higher learning in Massachusetts be enrolled in a qualifying student health insurance program or in a health plan of comparable coverage. Use this checklist to determine whether your plan is comparable according to Massachusetts regulations; coverage must be comparable in the state/country where you will be physically located while learning. Students physically located in the United States while learning cannot waive with foreign health insurance; however, students physically located outside of the United States while learning can waive with foreign insurance, as long as it adequately covers them in the country where they are learning. You may also use this chart to assess how coverage on your private plan compares to the Student Health Insurance Plan (SHIP).
